

Balance Beam "Club"

Soft training balance beam with special padding and "Vario" height adjustment. This padded beam made of aluminum profile has an additional, softer running surface under the durable synthetic leather than the competition beam. The balance between the softer running surface and the necessary stability is optimally matched. This reduces stress on the joints, minimizes the risk of injury and allows for a higher training frequency. When the height is adjusted, the feet remain in the same position so that the mats do not have to be moved.

TECHNICAL DATA

Reference number	1414230
Measurements	<ul style="list-style-type: none">• Upper surface: 500x10 cm• Height adjustment: from 60-90 cm in 10 cm steps and from 90-130 cm in 5 cm steps
Consisting of	<ul style="list-style-type: none">• Non-wrapping light metal profile• Running surface with soft padding• Sturdy synthetic leather cover• End cushions are made of PUR foam• Easy height adjustment through gas springs
Packing Data	<ul style="list-style-type: none">• Net weight: 86 kg• Gross weight: 91 kg• Packages: 1 case 505x25x25 cm, 2 foils 148x125x20 cm
Scope of delivery	<ul style="list-style-type: none">• Balance beam with aluminium profile• Pre-assembled balance beam legs
