

Vaulting Table “Ergojet Rio”

1407210

Top competition vaulting table, FIG certified. Developed by SPIETH and revolutionary in many ways. The good visibility of the large push-off area and the safe finish of the apparatus as well as the excellent dynamic characteristics protect the gymnasts from the risk of injuries. The new Ergojet Rio is more than a piece of competition equipment. Thanks to the smooth height adjusting system, maximum forces of 2500N on the hands and a clear push-off area, the new Ergojet Rio is also an ideal training apparatus for men and women alike as well as for the youngest gymnasts.

New height adjustment mechanism placed on the side

Newly designed safety padding

FIG Certified Competition Apparatus

Technical details:

- Reference number: 1407210.
- Top: 120x95 cm.
- Height: Adjustable 100-140 cm, per 5 cm.
- Weight: 150 kg.
- Height adjustment: Gas spring loaded for a smooth and easy handling. One single handle operates the height adjustment system and the included safety lock mechanism. Height changes will only take a few seconds. Clear height indication on the side. Robust steel construction, galvanised and epoxy coated.
- Fine adjustment: All feet are height adjustable to compensate for irregularities of the floor.
- Protection: **New protection** with a high absorption capacity foam to minimize the risk of injuries.
- Push-off area: **New foams** on the push-off area offer a very comfortable touch while **improved dynamics are guaranteed**. Even dynamic properties over the entire surface. Placed at an angle of 3° for a perfect visibility at the start of the run-up. Covered with non-skid fabric and a clear marked 'no-touch' zone.
- Spring System: **Further developed** spring system provides an improved resilience and an optimized stability at the middle and the back end of the surface.
- Transport: Transport System is included.
- Original System Reuther.
